# This week: Main feature

## Gamma.app

This tool lets you create PPT from prompts. Answer a few basic questions that it poses and then you have an editable PPT. What's more? It can even follow the brand guidelines. Just upload TNI brand guidelines in the space for it and see the magic work!

**Step 1**

Login to Gamma.app

## In this newsletter you will find:

Latest news, learning resources, fun stuff, and more. Keep reading!

**Step 2**

Click on import and choose "Theme import" to upload TNI brand guidelines (it is a one-time activity)

**Step 3**

Click on "Create with AI" and choose from one of the options shown

**Step 4**

Click on "Generate" to write prompts and get the system to generate the PPT!

# TRY THIS

## Tool of the week: Open AI browser- Atlas

Open AI launched Atlas browser further bolstering its dominant position in AI. With Atlas, when one turns on browser memories, ChatGPT will remember key details from content browsed to improve chat responses and offer smarter suggestions—like creating a to-do list from recent activity or continuing to research holiday gifts based on products viewed.

Browser memories are private to ChatGPT account and can be controlled to the extent of allowing access to certain websites only.

PS: Atlas is currently available only on Mac.

## AI Ethos

Think before you share. AI tools are powerful, but not private. Avoid entering confidential company data, and check with your team if you're unsure what's safe to use.

## Learning Corner:

Watch an interesting conversation on 'Enabling AI for productivity ramp-up'

## AI Prediction Challenge:

Ask ChatGPT/Co-pilot:
'What will offices look like in 2040?'
Share your favorite/funniest prediction.
